HUBBARD'S DRUG STORE

Almost Finished

New Grier Hotel and Depot are Nearing Completion

The new Grier hotel will be ready for its furnishings about April 15, if no delays occur. The building has a tiled roof, the first story being of brick veneer, and the second story, pebble dash finish, making it practically fire-proof. Many changes in the specifications have been made since the work on the structure began and every change has been to make the building better and at the same time more expensive. The ceilings of the lunch room and the dining room are paneled, and both have paneled walls, which will make these rooms two of the most attractive in the building. The office, in the east wing, will have a beamed oak ceiling, finished in the natural grain of the quarter sawed oak. The kitchen, in the north wing has a sanitary floor, and is one of the best lighted rooms we have seen, having fourteen windows. The refrigerator is built in the west wall, and is of the latest improved type, having separate compartments for meat, milk, butter, and vegetables. It is arranged to receive ice from outside, and ice being entirely separated from the food. A sewing room, a laundry room and a help hall take up the remainder of the first floor. The large furnace for the steam heat as well as large store rooms are located in the basement. There are twenty bedrooms on the second floor. Five of these have a bath, with a tiled floor and tiled walls. Every room will have a sanitary wash stand. The rooms are large and airy, and will be finished in birch with mullion windows. On the second floor there will also be a reception hall at the head of the stairs. All of the hardware used in the building is of a pleasing pattern in brass. Each of the bedrooms will have a fire escape.

With its modern conveniences, and under the noted Grier management this will be one of the finest and most correctly appointed hostleries in the west, and by far the best in this section of the state. The contract is being executed by James Dole, for Geo. B. Swift & Co., a large contracting firm in Chicago. The big job has been made more difficult because of the many changes that have been made in the plans since the work began. The station is a two story building, and will contain separate waiting rooms, ticket offices, baggage rooms, and express office on the first floor. The second floor will be entirely devoted to private offices of railroad men here. This will be completed about the same time as the hotel.

The two buildings when furnished will cost a trifle over \$100,000, while the original contract was for buildings to cost \$50,000.

This is a measure shows just what the Rock Island thinks of Liberal—the best town in the Southwest.

The Baptist Meeting

We are having a great and glorious meeting. Dr. J. R. Pentuff of Dallas, Texas come to us a comparative stranger. We find him a man of God. In many respects he is a great preacher. He is splendidly equipped for Evangelistic services. Profound religious experiences are behind him, years of service in the pastorate and the pulpit. In his preaching Dr. Pen-

J. L. Blankenship who is singing at the Baptist meetings here.

tuff sets forth faithfully and continually the fundamental doctrines of Divine grace, sin repentance, forgiveness, regeneration, justification and judgement. With a gentleness of a man that walks with God many are being led by the Spirit through his preaching to accept Christ and 35 have united with the church.

Brother J. L. Blankenship also from Dallas possesses a voice unequalled for sweetness and sings the "Old Story" with such sincerity and earnestness that we feel that he is Divinely chosen for the matchless work of winning souls for Christ. These meetings will continue through the week, you cannot afford to miss them.

STAGE LIGHTNING.

A new system of stage lighting has been devised by Signor Meriano Fortury of Venice, by which a diffused light, very like daylight, is obtained. Using electric arc lamps he so arranges them as to secure a reflection of their light from surfaces of cloth. The cloth for the purpose is made in broad strips, alternately light and dark, so that a dead white glare is avoided. The proportions of light and dark vary, and the cloth is arranged on rollers, controlled from in front of the stage, so that the operator can watch and change effects at will during the progress of the play. The sky-backing for each scene set is arched, to further the illusion, and the diffused lighting gives a remarkable result.

CONFUSION OF TONGUES.

"What did that automobile fender say when they took him from under the wreck of his machine?"
"The accident must have mixed him up, for when he recovered consciousness he muttered, 'That's a horse on me!'"

EXACT LOCALITY.

Caller—I've noticed a curious thing about dogs. They generally scratch themselves in the same spot.
Bobby (joining in the conversation)—Yes'm; ours always scratches himself behind the kitchen stove.

HELPFUL SUGGESTION.

Rivers was bellowing through the telephone to his wife, six miles away. "If you'll raise the window," said Brooks, "you won't have to use the telephone."

THE MAIN POINT

ABOUT TEETH

the main point is not looks, although the improvement in anybody's teeth quickly catches the eye, but greater by far is the
